

WHAT IS CLAIMED IS:

1 1. A controller, comprising:
2 a battery terminal holding member;
3 a switch board holding member, holding a switch
4 board on which a push switch is mounted; and
5 a parts holding member, mounted on a main board,
6 wherein the battery terminal holding member and the
7 switch board holding member are integrally formed on the
8 parts holding member.

1 2. The controller as set forth in claim 1, wherein the
2 battery terminal holding member holds a battery terminal
3 board;
4 wherein a rib is formed on the battery terminal
5 holding member such that the battery terminal board is
6 positioned to the battery terminal holding member.

1 3. The controller as set forth in claim 2, wherein the rib
2 is formed so as to surround the battery terminal board.

1 4. The controller as set forth in claim 1, wherein a
2 reinforcement rib is formed on the switch board holding
3 member so as to receive a force generated by an operation of
4 the push switch.
